Career Objective

Computer Science (AI & Data Science) undergraduate graduating in 2026 with strong programming fundamentals in Java and Python. Interested in Software Development roles at Excelacom where I can apply Data Structures, problem-solving skills, and software development knowledge to build scalable enterprise applications and contribute to system integration and application development projects.

Education

B.Tech – Artificial Intelligence and Data Science (2022–2026)
CK College of Engineering and Technology, Cuddalore | CGPA: 8.1

Technical Skills

Programming: Java, Python

Core CS: Data Structures, Algorithms, OOP, Problem Solving

Web Basics: HTML, CSS, JavaScript, REST API fundamentals

Databases: SQL, Database Design Concepts

Tools: Git, GitHub, Jupyter Notebook

Software Practices: Debugging, Code Optimization, Modular Design

Projects

Production-Level RAG System

Developed a Retrieval-Augmented Generation pipeline for structured knowledge retrieval and response generation, focusing on modular design and scalable data handling.

GitHub: https://github.com/ragesh28/Production_Level_Rag

ALL CAREER – Automated Job Aggregation System

Developed an automation system to collect job postings from multiple company career pages using structured modules for data extraction and storage.

GitHub: https://github.com/ragesh28/ALL_CAREER

WhatsApp Job Fetcher (Python)

Built a tool to extract and filter job and internship postings from WhatsApp groups using keyword-based parsing and structured data handling.

GitHub: <https://github.com/ragesh28/whatsapp-job-fetcher>

Competitive Programming

Solved 150+ LeetCode problems across arrays, strings, recursion, hashing, and core data structures, strengthening analytical thinking and coding efficiency.

Soft Skills

Strong communication, teamwork, adaptability, quick learner, and a proactive approach to problem solving.
