Product Developer – Fresher (Lumel Star Hire 2026)

BE Artificial Intelligence & Data Science student (2026) with strong foundations in Data Structures, Algorithms, and problem-solving. Passionate about building scalable software, writing clean code, and continuously improving systems. Seeking to contribute as a Product Developer at Lumel by developing high-quality web and enterprise applications while learning from experienced engineers.

Education

B.Tech – Artificial Intelligence and Data Science (2022–2026)

CK College of Engineering and Technology, Cuddalore

CGPA: 8.1

Technical Skills

Programming: Python, JavaScript, Java

Frontend: React.js (basics), HTML, CSS

Core CS: Data Structures, Algorithms, OOP, Problem Solving

Web & APIs: REST API concepts, Web Application Architecture basics

Databases: SQL basics, Data handling concepts

Tools: Git, GitHub, VS Code, Jupyter Notebook

Projects

ALL CAREER – Automated Job Aggregation Platform

Designed and developed a system that collects job openings from multiple company career pages using automation scripts. Focused on modular code, maintainability, and reliable data extraction workflows.

GitHub: [github.com/ragesh28/ALL CAREER](https://github.com/ragesh28/ALL_CAREER)

WhatsApp Job Fetcher (Python)

Built an automation tool to parse, filter, and structure job and internship postings from WhatsApp groups using keyword-based logic and data processing techniques.

GitHub: github.com/ragesh28/whatsapp-job-fetcher

Personal Portfolio Website

Developed a responsive portfolio website showcasing projects and technical skills with clean UI and structured layout design.

URL: ragesh28.github.io

Competitive Programming

Solved 150+ LeetCode problems covering arrays, strings, hashing, recursion, and core data structures, strengthening analytical thinking and coding efficiency.

Certifications

Mimo – Python Programming

Udemy – Machine Learning with Python
